

Level-Winding Hose Reel

(AC or DC Powered)

*AC or DC Power Supply

*Portable Use with Gas or Electric Power

Add the E-REEL™ package to your BROWNIE'S "BOAT" Air System today to create the ultimate diving system! Components can be installed wherever space permits and remain hidden from view when not in use, keeping your deck clean and functional. For ease of use, a push button momentary switch mounted inside the hawse fitting controls the rewind of the reel.

Is there really enough hose to see everything and have fun while diving with this system? The answer may surprise you. The E-REEL™ gives divers the freedom to explore an area almost 40% larger than an American football field!

Using the Boat Hookah System with the E-REEL™ upgrade is the easiest way to dive as it requires almost no heavy equipment, can be easily deployed in moments and automatically recoils with the push of a switch! The E-REEL™ package is the most convenient diving system available for your boat.

For Use on boats with AC power supply

E-REEL-AC Package includes:

- (1) Level-wind reel with 150 ft hose
- (1) Through-hull (Hawse) fitting with machined DELRIN hose guide, integrated push button re-coil switch, 5-amp reel motor breaker and 12-foot sealed pin connector wiring harness
- (1) KING STARBOARD mounting base, with battery hold-down slot and strap
- (1) 3-stage battery maintainer/charger
- (1) 5-amp hour sealed no maintenance battery
- (1) Marine grade electrical junction box with terminal strip for connection of 115-volt boat power supply to E-Reel package

For Use on boats with DC only power supply

E-REEL-DC Package includes:

- (1) Level-wind reel with 150 ft hose
- (1) Through-hull (Hawse) fitting with machined DELRIN hose guide, integrated push button re-coil switch, 5-amp reel motor breaker and 12-foot sealed pin connector wiring harness.

For portable use with gas or electric powered BROWNIE air systems

E-REEL-CUBE Package includes:

- (1) Level-wind reel with 150 ft hose,
- (1) Integrated push button re-coil switch, 5-amp reel motor breaker
- (1) KING STARBOARD "CUBE" enclosure with 1/2 -inch / 12mm clear top plate, slotted side handles, with battery hold-down slot and terminal connection protector
- (1) 6-amp battery maintainer/charger
- (1) 20-amp hour, sealed, no maintenance battery
